

Date	23 July 2026
Project Name	SB-STOCKS
Maximum Marks	2

Proposed Solution

Solution Overview

A full-stack stock trading simulation platform built with the MERN stack that enables users to practice stock trading using virtual funds.

Key Features

- User Registration and Login
- Stock Listing and Search
- Virtual Buy/Sell Transactions
- Portfolio Management & Dashboard
- Watchlist Management
- Admin Stock Management Panel
- Historical stock trends & Charts
- Role-based access control

Target Users

Students, beginners, finance enthusiasts, experienced traders testing strategies.

Value Proposition

Risk-free stock trading education with real-time market data.
