

Code-Layout, Readability and Reusability

Date	Team ID	Project Name	Maximum Marks
		SB Stocks	2

This document describes the coding standards and project structure followed.

Project Folder Structure:

```
sb-stocks/  
|-- app.py (Main Flask application)  
|-- config.py (Configuration settings)  
|-- models.py (Database models - User, Portfolio, Transaction, Watchlist)  
|-- routes/  
|   |-- auth.py (Authentication routes)  
|   |-- trading.py (Buy/sell routes)  
|   |-- portfolio.py (Portfolio routes)  
|   |-- stocks.py (Stock search & data routes)  
|-- services/  
|   |-- stock_api.py (Alpha Vantage API service)  
|   |-- trading_engine.py (Trade execution logic)  
|-- static/  
|   |-- css/style.css  
|   |-- js/main.js  
|-- templates/  
|   |-- base.html  
|   |-- login.html  
|   |-- register.html  
|   |-- dashboard.html  
|   |-- portfolio.html  
|   |-- trade.html  
|-- requirements.txt  
|-- README.md
```

Coding Standards:

- 1. Naming Conventions: snake_case for variables/functions, PascalCase for classes
- 2. Documentation: Docstrings for all functions and classes
- 3. Modularity: Separate concerns into routes, services, and models
- 4. DRY Principle: Reusable utility functions in services layer
- 5. Error Handling: Try-except blocks with meaningful error messages
- 6. Version Control: Feature branch workflow with meaningful commit messages

Code Readability Practices:

- Consistent indentation (4 spaces)

- Meaningful vari

Code Reusability:

- stock_api.py service reused across stock search, trading, and portfolio modules

- Base HTML tem
